Plus Series | Surface Light Wave Touch Technology

There is always a bit of touch at the core of learning

4K Ultra High Definition (UHD) panels for education are the latest technology tools that transform the way our classrooms look. We have designed our Coretouch Plus series of UHD LED panels as state-of-art large screens specifically suited for classroom environment. These panels come with 20 touch points, a sturdy bezel framework for school environment and smooth glass surface for glide touch writing experience. Panels have built-in Cloudnote software that allows teachers to bring in multiple teaching resources in a single file. For digital content, teachers can use the Corestore App and access thousands of teaching resources from world's best publishers, right inside their classrooms, on their interactive panels

Coreboard A1

Add an intelligent touch to your classroom

The CoreBoard A1 interactive whiteboard system is an integrated all -in-one solution using the patented Surface Light Wave (SLW) touch technology which is far superior than any other touch solution. It is powered by an factory integrated OPS-PC with Intel Processor, 4GB memory, 128G SSD storage, integrated speakers, Wi fi capability and supports Windows. Its single button solution makes it stand out as a simple and seamless offering in its category. No other solution is as integrated as the CorBoard A1 interactive whiteboard system.

Coreboard 7i

Interactive Learning Starts Here

The CoreBoard 7i interactive whiteboard is an ideal introduction to digital learning. It offers natural touch functionality which makes it easy for students and teachers to use and help enable quick and successful adoption. Quality and affordability come together in the easy-to-use CoreBoard7i, which offers both finger and pen touch functionality.With the new CoreBoard7i interactive whiteboard, every student can experience the benefit of hands-on, interactive learning.

Core Screen

Add an intelligent touch to your classroom

CoreScreen takes virtual classroom or online tutorials to the next level. It allows you to create virtual classrooms using any interactive device as long as you have a browser with internet connectivity. Remote participants can join the live sessions instantly and see in real time what is being written on the whiteboard while listening to the presenter's audio in any device with an internet enabled browser without having to install any software.

## Real Time Campus Tracking Solution

Campus Track accurately monitors in real time, the location of students, staff, faculty, visitors and guards in schools, colleges or university campus. Powered by one of the most powerful application software it integrates all the hardware components and provides meaningful output and view to users and management to locate, monitor and track students in real time. Administrators can track anyone in the campus in a GUI or a large digital map.

Campus Track helps provide detailed MIS reports, search to locate students or visitors, manage student attendance, receive notification alerts, ring fence campus as well as departmental view of the college.

CloudNote

Bring Ideas Together Effortlessly

CoreBoards are powered by the CloudNote collaborative learning software which sets the standard for creating, delivering and managing interactive lessons within a single application. It is easy to create with the CloudNote software. Teachers can build lessons by pooling in resources from various sources like printed documents, internet, video, audio, PPT, PDF, all in an unbound space without having the need to open these applications.The intuitive features wrapped in a simple interface let teachers effortlessly build interactive lessons. Once they have designed the lesson, they can use it again and again. They will save preparation time and be able to share it with students after class.
